Description & advantages

ALPAFOOD : Fibers & pellet feed

Made in France, this feed formulated for small camelids contains 30% of fibers. Due to its cereal-free recipe, its starch content is low so that it suits the very particular digestive system of llamas and alpacas.

Containing dehydrated alfalfa and grass, coupled with vegetables (carrots/beets), and enriched with linseed, this innovative feed optimizes the animal's digestive process. A 12% intake of protein backed by vitamin pellets ensures their health and vitality!

Use Instructions

For adult alpacas :

from 350 to 400 gr per day, with hay at will

+ Alpamin intake (minerals and trace elements) of 1 gr per kg live weight

For pregnant alpacas:

500 gr per day, with hay at will

+ Alpamin intake (minerals and trace elements) of 1 gr per kg live weight

For llamas: double the intake
